

China Policy, Burma Misery

Rally on The Eve of Olympic Closing

China is celebrating and making history by hosting world's precious Olympic. However, we must not forget millions around the world who are suffering due to Chinese arms along with their diplomatic and economic support to brutal regimes. The suffering of the 50 million plus people in Burma under the brutal dictatorship is an outstanding example of abuse fueled by Chinese arms. China must act responsibly and help the people of Burma, not the dictators there --

No More China's military, economic and diplomatic support to Burma's dictators.
